Chris Temple
Editor/Publisher

Good morning, Chris

When I added Ecuador-focused mining company **Core Gold (TSXV-CGLD; OTC-CGLDF)** to my recommended list about 10 months ago, I was astonished to find that most "experts" even in the resource arena were unaware that the company's management had changed nearly a year prior.

Until current C.E.O. Keith Piggott and his team came in back in September, 2016, the company (formerly known as Dynasty Metals & Mining) had pretty much been run into the ground. Millions of dollars of bills to vendors were unpaid, as were wages. Workers were rebelling. Exploration and development activity had pretty much ground to a stand still. The company was in danger of losing its concession areas; as those of you who have followed the company know, *some of the highest-grade and most prospective ground in the country.*

Almost two years later, the recovery and growth of the company under Piggott's care is picking up steam. Gold production is slated to *double* over the next year. Great strides have been made in paying off the debt--and cleaning up the bigger mess in so many areas--left by past management.

Not long ago I interviewed Piggott on this turnaround and--even more important for the future--**the astonishing exploration potential here.** You can listen to this interview--and check out my initial recommendation of the company--[RIGHT HERE.](#)

A MASSIVE TURNAROUND STORY

Since taking over management of the Company in September 2016 the new Core Gold management team has accomplished the following:

METRIC	BEFORE 09/2016	PRESENT DAY
Employees	600	250
Concessions	At Risk	Secured
Local Subsidiaries	In Receivership	In path to good standing
Labour Force	On Strike	Working
Producing Mining Units	None	Dynasty Goldfield
Explorations Projects	None	Linderos, Copper Duke
Au Production	None	22-26k oz Au 2018E 50-60k oz Au 2019E
Asset Monetization	None	\$1M of non-core asset sales

TSX-V:CGLD

Just a few days ago, Dr. Allen Alper of *Metals News* chatted with Piggott as well; you can check out that conversation [RIGHT HERE](#), via the *Stockhouse* web site. This lengthy discussion will update you on all the "nuts and bolts" of what is **not only a compelling turnaround story, but one of the most explosive growth stories in the exploration space, PERIOD!**

As I'll also be updating my Members on shortly, Ecuador continues to garner attention as THE hot new mining jurisdiction in the world. And when you get your head around Core Gold's renewed growth *and exciting exploration upside*, you'll appreciate not only why its share price has held up MUCH better than is the case with its peers, but -- beyond that -- STILL doesn't *begin* to reflect its likely value.

So take the time to acquaint -- or reacquaint -- yourself with Core Gold, one of the most compelling recommendations I have made to my Members here at *The National Investor*.

And as always, if you have any questions or comments, let me know!

All the best,

Chris Temple -- Editor/Publisher
