Chris Temple
Editor/Publisher

Greetings, Chris --

First, I wanted to pass along [THIS LINK](#) to a *New York Times* story out this morning on BHP Billiton's newest investment in SolGold, plc.

SolGold's own [PRESS RELEASE](#) on this latest infusion from BHP discusses numerous corollary provisions, *including the addition of a BHP nominee to SOLG's board.*

As I quipped last night, the plot thickens! I'll have more thoughts for Members soon.

Now on to **BacTech Environmental (CSE-BAC; OTC-BCCEF).**

Last week, the company [ANNOUNCED](#) that it has signed a Memorandum of Understanding with an Ecuadorian-based company -- Green Oil -- for a potential "green mining" and remediation project in Ponce Enriquez, Ecuador.

Green Oil, an environmental consulting, engineering and project management company has agreed to work with BacTech to develop an understanding and a "go forward" plan for a bioleach facility to be based near Ponce Enriquez. The purpose of the plant will be to reprocess significant amounts of tailings generated by small mining in the PE area.

Green Oil -- learn more at <http://www.greenoil.ec/> -- was established in 2001 and involves over 100 professionals who combine experience with in-depth knowledge of protocols and legal compliance systems to achieve technical and cost-effective solutions for a variety of environmental projects on behalf of their international clientele guaranteed with quality certification ISO 9001.

Already, as I have written previously and discussed with BAC's chief Ross Orr (an archive of all my coverage on this unique company can be seen [RIGHT HERE](#)) **even government officials in Ecuador are keen on BacTech's technology.** At the same time President Moreno has sought to *accelerate* the growth of the company's official mining sector,

he is **simultaneously seeking to solve many intractable economic and environmental problems caused by unsafe small scale and artisanal mining.**

A lot of eyes in both the public and private sectors are on BacTech; *yours should be too!* If you haven't already done so, check out the company's revamped/updated web site [RIGHT HERE](#).

And don't forget -- for those in the area or who can travel to make it, Mr. Orr will be presenting BacTech and answering your questions as one of several companies that will attend **our upcoming Chicago Natural Resource and Technology Expo!**

Don't miss this opportunity to learn first hand of not only BacTech's story, but those of several other unique emerging growth companies.

DATE: Friday, November 9, 2018 --Doors will open at 12:00 p.m.

Be prepared for a *very* full day / evening of presentations, discussions and a lot more on the diverse lineup of companies we have in attendance in numerous industries!

And for those of you who can make it, **Saturday morning, Nov. 10** will also feature a follow-up panel discussion, where Yours truly will moderate conversations with representatives of each company!

Visit the CRE's site [RIGHT HERE](#) where you can read of a roster of the companies/speakers and Register for FREE.

Hotel information and a discounted room rate are also available at the site (but hurry, as time and space are limited.)

As always, if you have any questions or comments, let me know!

All the best,

Chris Temple -- Editor/Publisher
